

Wolfie's Corner

This month I want to talk about bee and wasp stings. Some of my friends have been getting stung, because we dogs like to chase

things that move. Things like flies and bees are really fun to catch. I personally am very good at it. If your pet gets stung, call your vet immediately. Bee and wasp stings can bring on anaphylactic shock, which is pretty frightening to dogs and their humans. The treatment is usually a Benadryl type injection. In cases of getting stung-play it safe!

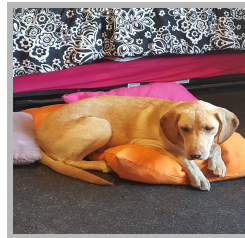

Tip: When you need to schedule a visit, texting or emailing my Mom is the best way. She may not respond to you if it is a Sunday or after 8 PM- until the following day. If you have NOT gotten a response sometime the next day, she may have not gotten the message!!

CAT TALES

This is my cute little friend Otis. He shares his home with two human companions and a dog, not including the one behind him. He has a good life, he comes and goes at will through the doggy door and has a backyard full of wildlife to keep him entertained. On one occasion when I was visiting him, I pulled up just in time to see Otis run across the yard with a large bird of prey in pursuit. I certainly, just about had a heart attack. I guess he knew what he was doing, because he didn't seem concerned over the incident in the least!

Dog of the Month

Meet Luke! He has been with us since he was a puppy. With so many "Luke's" at daycare we called him Baby Luke, and it just stuck. He is a a great helper at our meet and greets. You can find Baby

Luke here every Tuesday and Thursday. His housemates are mastiffs and make him feel small. Perhaps that is why he enjoys playing with the puppies at daycare. Luke always enjoys a game of tug-of-war with anyone who will play. And he is a Yappy Hour regular.
